

# Unlocking the Potential of Digital Assets and Tokenization in Wealth Management

3.00pm

Unlocking the Potential of Digital Assets and Tokenization in Wealth Management

- In the aftermath of the FTX collapse, and a host of other negative news in late 2021 and 2022, then the cryptocurrency recovery in 2023, is the worst over for investors in cryptocurrencies?
- What are the infrastructure building blocks required for institutional investors, asset managers, private banks who want to work with digital assets?
- How has regulation evolved since the crypto exchange chaos, and are the current safety measures adequate for investors within the existing digital assets ecosystem?
- What are the regulatory updates we need to consider?
- What is Tokenization? What kinds of tokenized assets might become popular in the future?
- Why Should Asia's HNWIs and UHNWIs Invest in Digital Assets?
- Should Private Banks and Wealth Managers Recommend Digital Assets as part of a comprehensive strategy? What clients are they suitable for?
- How much should HNWIs and UHNWIs invest in digital assets?
- What are the main obstacles for banks and wealth managers in starting a digital asset strategy?
- How can banks and financial advisors teach their clients about cryptocurrencies and digital assets? What good will this do?
- What changes or improvements do industry participants want to see in the new field of digital securities and tokenization?
- How can one invest safely and smartly in digital assets? How should they keep these digital assets secure?
- What's coming next for digital assets, and what does this mean for wealth management in Asia?
